

Many organizations face strategic paralysis navigating today's generative AI landscape. Accelerate Partners delivers a structured, governance-first methodology that moves firms from uncertainty to responsible AI adoption safely, efficiently and with measurable business impact.

THE CHALLENGE

NAVIGATING AI CHALLENGES

Organizations face hesitation due to an overwhelming generative AI landscape and strategic paralysis when deciding where and how to begin.

STRUCTURED ADOPTION APPROACH

Accelerate Partners provides clear methods to transition from uncertainty to responsible AI adoption with minimal disruption.

GOVERNANCE & ENABLEMENT FOCUS

Emphasis on governance frameworks and practical enablement ensures safe, compliant, and effective AI deployment across the enterprise.

EMPOWERING DECISION-MAKERS

Providing clarity and structure helps executives confidently evaluate AI options and integrate automation at the right pace.

OUR PROVEN AI DILIGENCE ACCELERATOR PROCESS

1

STAKEHOLDER DISCOVERY

Collect detailed insights on business functions & workflows to ground AI initiatives in real operational needs.

2

AI-DRIVEN ANALYSIS

Use transcript analytics to identify themes, assess data readiness, & map AI opportunities for measurable impact.

3

RESPONSIBLE AI FRAMEWORKS

Integrate best practices & governance to ensure compliance, security & explainability in AI adoption.

4

PLATFORM EVALUATION & SOURCING

Evaluate AI tools & platforms tailored to business goals & risk tolerance for optimal implementation.

5

IMPLEMENTATION ROADMAP

Develop timelines, governance guardrails, & change-management strategies to drive adoption and success.

THE OUTCOME: AI YOU CAN ACTUALLY USE

Prioritized AI Use Cases

A curated list tied to business value: cost efficiency, productivity gains, and revenue growth.

Fit-for-Purpose AI Platform

Recommendations aligned to operational needs, compliance requirements, and scalability goals.

Readiness & Governance Checklist

Data quality, regulatory compliance, and organizational readiness fully assessed before deployment.

Phased Roadmap Execution

30-, 60-, and 90-day milestones move teams from ideation to execution with reduced risk.

MEET YOUR ENGAGEMENT LEAD

MA

Mark Aklian

CISO · ENGAGEMENT LEAD

Mark is a cybersecurity and risk executive with 25+ years in financial services, most recently serving as COO of Cybersecurity at Point72. He brings hands-on experience securing private AI platforms in regulated environments, protecting sensitive information, and implementing strict controls to prevent IP leakage and meet compliance obligations. Mark now helps firms assess AI readiness, recommend secure and dedicated AI solutions, and establish governance frameworks essential to effective adoption and operationalization.
